

GP FOCUS GROUP KEY THEMES.

Share with us, your experiences in providing primary palliative care :

Advantages and disadvantages of the current model of palliative care provision.

1. What could we do to improve on the current model?
2. An understanding of primary palliative care.
3. Working and meeting as a member of a multidisciplinary team.
4. The core components of a sustainable future model of palliative care provision.
5. The professional, clinical and or psychosocial issues which generally prompt you to refer a patient for specialist palliative care intervention.
6. Clarifying the roles and responsibilities of primary providers and the specialist palliative care service in the provision of coordinated primary palliative care.
7. Identifying the educational, support, networking and mentoring needs of GPs.
