

Consumer Representatives Needed!
Do health issues interest you?

The Nepean Division of General Practice is a non-profit organisation that supports General Practice in the Nepean area. It is run by a board of local General Practitioners and is committed to responding to the local needs of the community.

The Division is seeking interested people to expand its active consumer reference group and/or to provide input into specific working groups including immunisation and chronic disease management (diabetes, asthma, cervical screening).

Groups meet approximately four times per year and remuneration is paid for attendance.

Representatives provide a consumer perspective into specific programs and directions of the Division to ensure our work meets the needs of the community. No medical knowledge is needed, just an interest in having an efficient and effective health service for our local community.

If you live in the Penrith Local Government area and would like further information, please contact Lizz Reay or Michael Edwards on 4721 1150
