### Useful demographic information

Barriers and Enablers:

We have no information on barriers to involvement in after hours care, however anecdotally the GPs in our area feel that A/Hrs services are adequate, and they also want 'a life' and therefore are not keen to commit to working beyond their own practice hours although they see value in others doing so.

**Is supporting after hours service delivery or development part of your 2003-2004 business plan?** The Division is undertaking a research project regarding after hours service provision on behalf of the State Government.

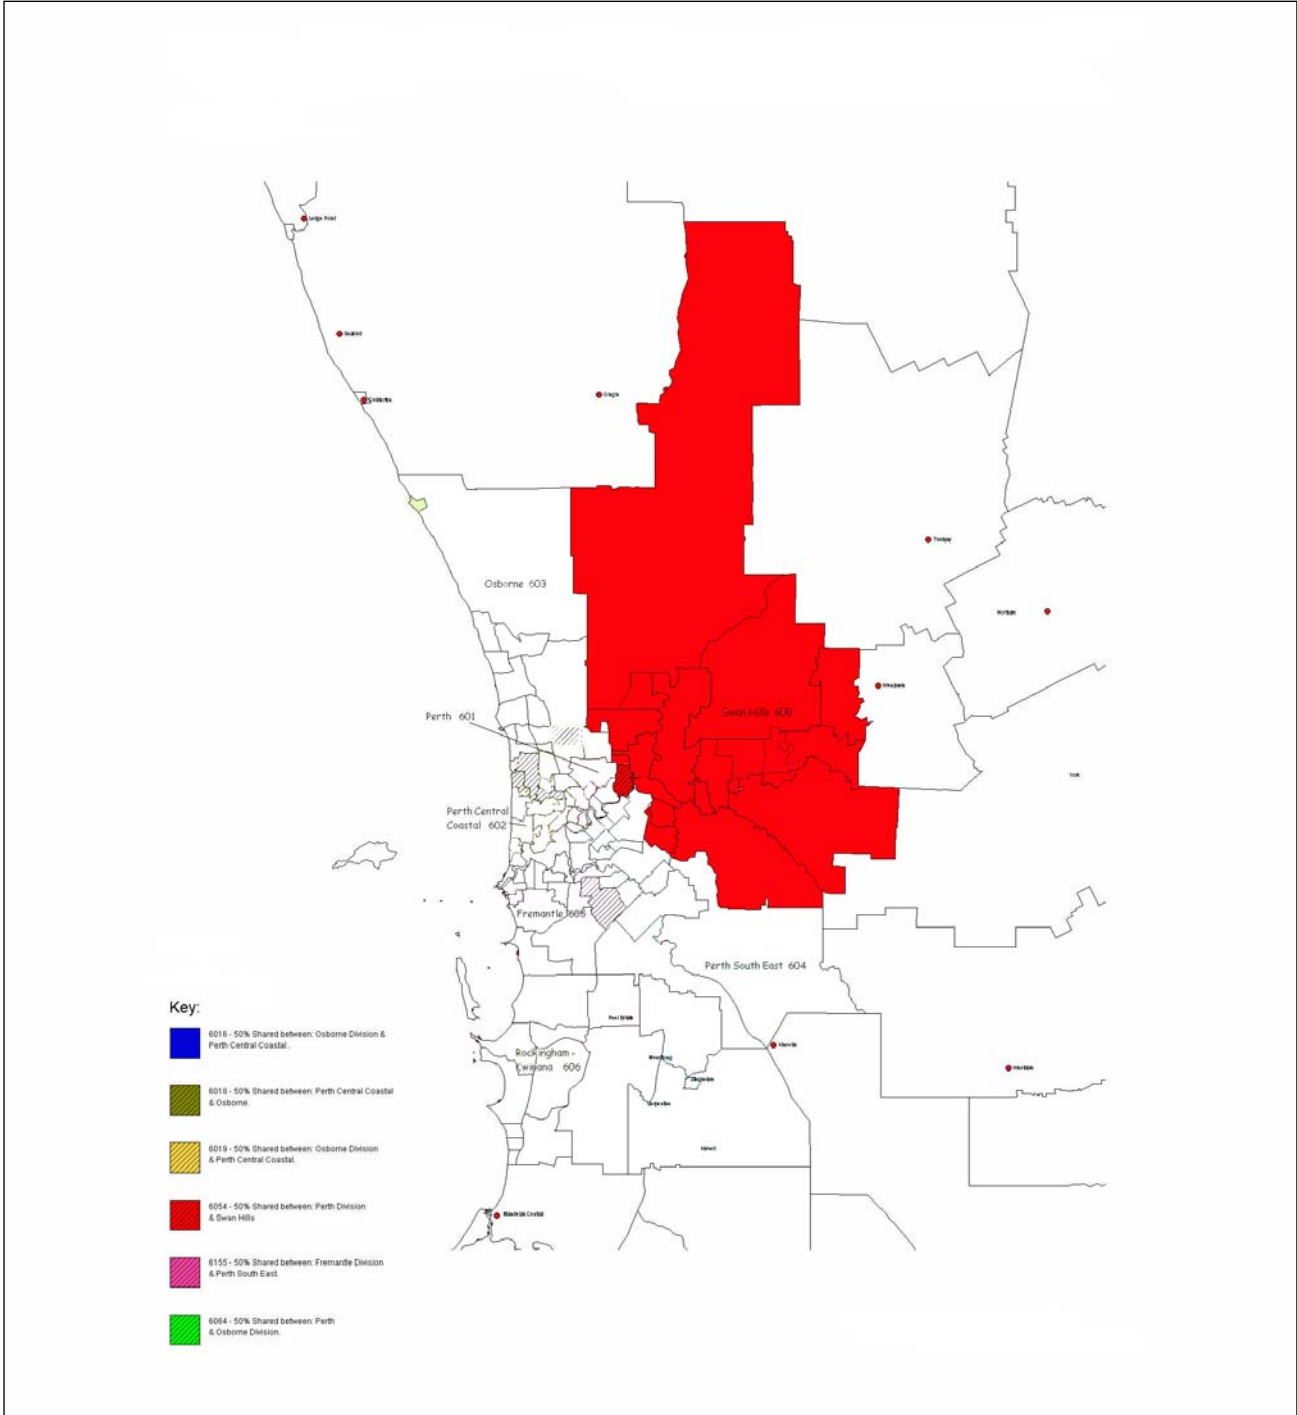

### Useful demographic information

<b>Services</b>	<b>Details of services</b>	<b>Information and background</b>
One practice provides a mobile phone number on the answering machine for patients to call regarding after hours issues.		A number of individual doctors will give their contact details to certain patients for after hours calls if they are, for example, elderly and have specific anticipated problems. This service is only available at the doctor's discretion.
Fourteen practices advise patients with after hours concerns to attend the Rockingham Kwinana District Hospital Emergency Department		It is also important to understand that a very large cohort of patients within the District do not have a regular GP, and the Emergency Department at the District Hospital is their principal medical service provider. This last factor is being systematically examined at the moment by a research project through Curtin University.
Around 4 calls per day are placed from the District (with a population of 96,000) to the HealthDirect service, a number of these may have accessed a GP after hours service in the past.
