

28-30 APRIL 2006

MEDINA ON CROWN 359 Crown Street Surry Hills, SYDNEY

The ASHM Short Course in HIV Medicine gives medical practitioners comprehensive training in the science of HIV, current pharmacology, monitoring and treatment, as well as the complicating factors surrounding HIV management.

Module 1 – HIV basic science and pathogenesis – is available by distance-learning package on CD-ROM. This highly accessible learning tool provides excellent preparation for the face-to-face components of the course.

Modules 2 – 7 take place over three days and include specialist presentations and facilitated small group work.

Module 8 – Clinical skill development – offers a choice of self-directed activities to be completed within 2 weeks after the course. One option available is clinical practice observation.

Completion of the full 8-module course and its associated assignment enables GPs to apply for the right to prescribe s100 drugs for HIV in NSW and ACT. The *Certificate of Attainment* from the course is recognised by many other bodies in Australia and New Zealand. Newly qualified prescribers must agree to participate in ASHM's mentorship program.

Medical practitioners with an interest in HIV are welcome to enrol in any or all of the modules as part of their continuing medical education.

FREE
TO NSW/ACT DOCTORS

The course is available FREE to doctors in NSW and ACT. For everyone else, the cost for each day is **\$150.00** for

ASHM members and **\$180.00** for non-members. There is no GST component. The *HIV basic science and pathogenesis* CD-ROM (Module 1) is free to those who enrol in all 8 modules and \$50.00 plus GST as a stand-alone item. Module 8 is a free component of the course.

Each module attracts 2 CME points for current HIV s100 prescribers. RACGP QA&CPD, AChSHM and RACP MOPS points are also available.

Register early! Numbers limited. Registrations close **1 April 2006**
